Get any 4 of these FREE — a \$198 value!

Maneuvers for COM/CFI — learn how to set up optimally for each maneuver, properly coordinate pitch, power, bank angle and rudder ... and how to avoid or correct common errors—techniques that will help make you the obvious master of your aircraft.

Complete Airspace Review — Learn a foolproof, fun way to remember specifics about each class of airspace. You'll also review other kinds of airspace you should know about—Special Use Airspace, Controlled Firing Areas, Military Training Routes, Temporary Flight Restrictions, Special Conservation Areas and more.

Taming Stalls And Spins — Learn what causes a stall ... how it can transition to a spin ... how to instantly recognize & avoid situations that might result in loss of control ... & steps to take in the event you find yourself in a stalled condition.

Surviving Systems Emergencies — This life-saving course gives you clear, concise procedures for solving each problem that may emerge. KING's techniques and tips make it easy for you to remember the procedures during extreme stress.

Takeoffs and Landings Made Easy — Change takeoffs and landings from a trial to a joy. You'll impress your passengers (and yourself) with flawless takeoffs and landings even in stiff crosswinds.

VFR Cross-Country Flying — Learn tips to keep you out of trouble, how to make navigation easy, ways to obtain & evaluate weather while enroute, and a flight-tracking system, so you'll never get lost!

Communications — Through real-world communications with actual controllers you'll learn first-hand proper communication procedures, techniques to use in every class of airspace.

Practical Risk Management For Pilots — course will teach you the procedures and techniques that you need to manage aviation risks effectively. You'll be able to assess and manage risks confidently ... leading to safer flying and more fun in the cockpit.
